WS 201V I CA

Vandal resistant IP wallmount station with built-in Axis camera

Professional audio and video

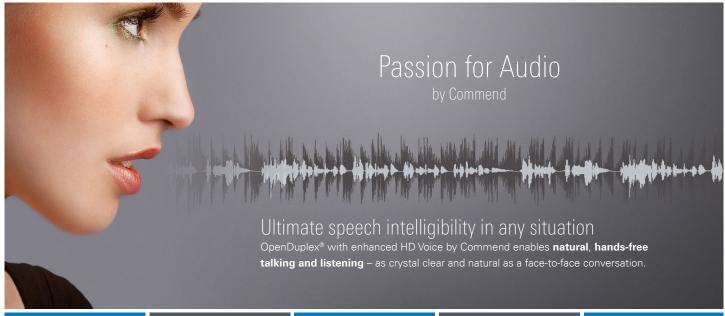

The vandal resistant station with built-in high-performance Axis camera is developed for areas with high requirements on safety and system integration. The integrated technology allows excellent speech quality and comprehensibility independent of background noise.

The 3 mm stainless steel front panel with poke protection and special screws protects against vandalism. The robust construction provides full protection against water, dirt and dust – IP rating IP66. The button can be allocated to a call number and the label area can be filled in individually.

Features and highlights

- Compatible with third-party components, e.g. NVRs
- Multiple H.264 and MJPEG streams possible
- Excellent video quality, including HDTV 720p and H.264
- Vandal resistant and detection of tampering attempts such as blocking or spray-painting
- Backlit direct dialling button and label area
- Supports DSP features such as OpenDuplex®, audio monitoring and loudspeaker/microphone surveillance

Audio // Basics

eHD Voice	Enhanced HD Voice by Commend transfers the audio signal at a bandwidth of 16 kHz , thus capturing the entire frequency spectrum of the human voice.
STI	Speech Transmission Index 0.96 – measured under acoustic laboratory conditions (STI is a standard measure for speech intelligibility; it has a possible maximum value of 1.00, which corresponds to perfect intelligibility)
Sound pressure	
level	High volume up to 99 dB
	High volume up to 99 dB Highly efficient class-D amplifier with 2.5 W
level

Audio // Functions

Loudspeaker/microphone surveillance – ensures the availability of the Intercom station while reducing the need for manual verification of its functionality

Audio monitoring – fully automated emergency calls triggered by defined noise levels for more security

Peer-to-peer audio – reduces network and server load to ensure efficient use of resources

Audio recording and lip-synchronous audio/video recording of conversations for documentation and evidence keeping purposes

Conference call function for simultaneous talking with multiple conversation partners

Speech activity detection senses when calls are finished (no microphone signal) and terminates the connection automatically

Simplex mode for applications requiring controlled communication – e. g. for security solutions based on the "push-to-talk/release-to-listen" method

OpenDuplex® for natural, hands-free communication

IVC (Intelligent Volume Control) automatically adjusts the device's volume setting to the ambient noise level

Public address functions

	Weight incl. package:	approx 1,500 g (3.3 lbs)

Line length in LAN

The maximum line length of Cat. 5 cabling in a LAN is 100 m (328 ft) – e.g. from switch to Intercom station.

Extent of supply

- Intercom station
- Short reference
- Screws for mounting
- Snap-on ferrite

Technical data Axis camera

General

Memory and storage:	512 MB RAM, 256 MB Flash
	support for microSD/microSDHC/microSDXC card
	support for SD card encryption
	support for recording to NAS (Network-Attached Storage)

1/2 9" progressive scan RGR CMOS

Camera

Imana cancar

illiage selisui.	1/2.5 progressive scall hab civios
Lens:	2.8 mm, F2.0, 115°
Total horizontal camera angle of view (incl. mechanical adjustment range):	165°
Camera angle adjustment (mechanical):	± 25°
Light sensitivity:	HDTV 720p 25/30 fps with Lightfinder color: 0.06 lux at 30 IRE F2.0
Shutter time:	1/32,500 s to 2 s

Shutter time:	1/32,500 s to 2 s
Video	
Video compression:	H.264 (MPEG-4 Part 10/AVC) Profile Baseline, Main and High MJPEG
Resolution:	160 x 90 to 1,280 x 720 pixels
Frame rate:	up to 25/30 fps (50/60 Hz) in all resolutions
Video streaming:	multiple, individually configurable videostreams in H.264 and MJPEG, AXIS Zipstream technology in H.264, controllable frame rate and bandwidth VBR/CBR H.264
Image settings:	compression, colour, brightness, sharpness, contrast, white balance, exposure control, exposure zones, fine tuning of behaviour in low-light conditions, rotation (0°, 90°, 180°, 270°) including Corridor Format, text and image overlay, 20 individual privacy masks, mirroring of images, Traffic Light mode

Network

Security:	password protection, IP address filtering, HTTPS ²⁾ encryp-
	tion, network access control, digest authentication, user
	access log, centralized certificate management
Currented protocolor	ID. A. ID. C. LITTO LITTOC 2) CCL (TLC 2) Co. C. Lover 2 DiffCore

IPv4, IPv6, HTTP, HTTPS ²⁾, SSL/TLS ²⁾, QoS Layer 3 DiffServ, FTP, SFTP, CIFS/SMB, SMTP, Bonjour, UPnP[™], SNMP v1/v2c/ Supported protocols: v3 (MIB-II), DNS, DynDNS, NTP, RTSP, RTP, TCP, UDP, IGMP,

RTCP, ICMP, DHCP, ARP, SOCKS, SSH ²⁾ This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (www.openssl.org), and cryptographic software written by Eric Young (eay@cryptsoft.com).

System integration

Application Programming Interface:	open API for software integration, including VAPIX® and AXIS Camera Application Platform, AXIS Video Hosting System (AVHS) with One-Click Connection, ONVIF® Profile S and ONVIF® Profile G
Analytics:	included: AXIS Video Motion Detection, active tampering alarm ³⁾ supported: AXIS Perimeter Defender support for AXIS Camera Application Platform enabling installation of third-party applications
Event triggers:	analytics, time scheduled, edge storage events
Event actions:	record video: SD card and network share upload images or video clips: FTP, SFTP, HTTP, HTTPS, network share and email pre- and post-alarm video or image buffering for recording or upload notification: email, HTTP, HTTPS, TCP and SNMP trap PTZ: PTZ preset, start/stop guard tour overlay text
Data streaming:	event data

³⁾ For detection of tempering attempts in static and non-crowded scenes.

System requirements

Intercom Server

- GE 800 (min. PRO 800 3.0) with G8-IP (min. G3-8-IP 4.0B01) or
- GE 300 (min. PRO 800 3.0) with G3-IP (min. G3-8-IP 4.0B01) or
- IS 300 (min. PRO 800 3.0) or
- S3/S6 (min. version 7.1) or
- VirtuoSIS (min. version 3.0)
- For displaying the camera image on monitor modules of the WS series: min. upgrade licence PRO3U

Backwards compatibility to GE 700 or GE 200

- GE 700 (min. PRO 5.7) with G7-DSP-IP or
- GE 200 (min. PRO 5.7) with G2-DSP-IP
- Detected as ET 908 therefore, they can only be used with the feature scope of an ET 908
- Firmware download only possible with GE700-UPG or via IP Station Config!

Configuration software

- Configuration software min. CCT 800 3.0
- Configuration software IP Station Config (included in setup of CCT 800 3.0)

Network requirements

IP addresses and ports

- For the WS 201V I CA, the DHCP functionality is available. If DHCP is not used, the WS 201V I CA must have a fixed IP address.
- In case of a changing public IP address, dynamic registration of a WS 201V I CA is possible.
- Communication from the software IP Station Config is done via port 16399 (cannot be configured).
- Communication from the WS 201V I CA to the Intercom Server (UDP protocol) is done via port 16400 (configurable).

QoS requirements

- One-way delay max. 100 ms
- Jitter max. 50 ms
- 0% packet loss for perfect audio quality

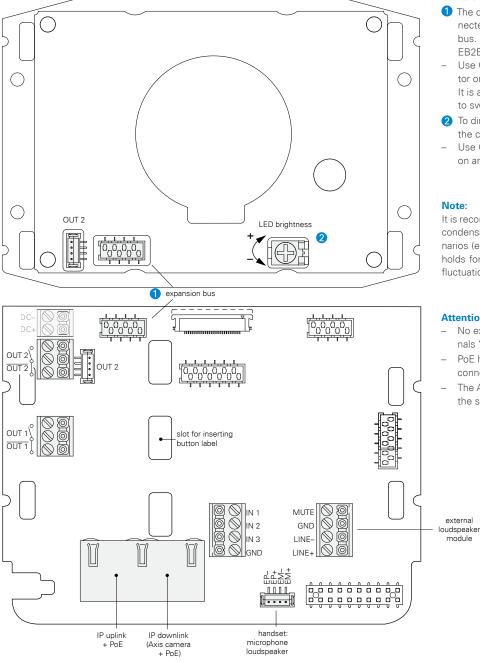

Bandwidth

- Required bandwidth incl. protocol overhead per WS 201V I CA, for upload/download each: 96 kBit/s (speech and data no video)
- Speech is compressed according to G.722 standard.

WS 201V I CA Installation instructions

Connection

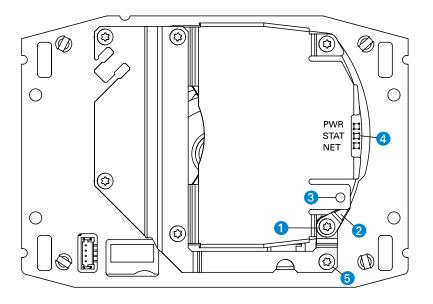

Camera illumination and heating control

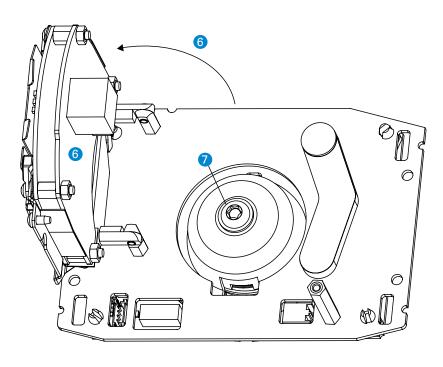

- 1 The camera illuminator and the heating control are connected to the main board of the station via the expansion bus. In CCT 800, the device is shown with an additional EB2E2A device.
- Use OUT 1 on the EB2E2A to switch the camera illuminator on and off.
 - It is also possible to use OUT 1 as attendant contact, e.g. to switch on the camera illuminator at call setup.
- To dim the camera illuminator, use the potentiometer on the camera board.
- Use OUT 2 on the EB2E2A to switch the camera heating on and off.

It is recommended to keep the heating on permanently to avoid condensation on the camera glass in certain installation scenarios (e.g. inside metal columns). The same recommendation holds for environments where the station is exposed to large fluctuations in temperature and to high humidity.

- No external power supply may be connected to the terminals "DC-" and "DC+"!
- PoE has to be connected to the RJ45 jack "IP uplink" (see connection diagram).
- The Axis camera is connected to the "IP downlink" jack of the station PCB.

Axis electronic module

Note:

For further information on installation and settings, see Axis manual "P3904-R Mk II".

Control button

Follow the steps below to operate the control button:

- Loosen the screw 1 (Torx T8).
- Turn the safety lever 2 outwards.
- Push the control button 3.
- Turn the safety lever 2 back into its original position and tighten the screw 1.

Follow the steps below to reset the camera to the factory default settings using the control button:

- Disconnect the power supply from the camera.
- Press and hold the control button 3 and reconnect the power supply.
- Keep the control button pressed until the LED indicator 4 flashes amber.
- Release the control button. If the status LED 4 turns green, the process is completed.

Attention:

After a reset, the camera must be reconfigured, otherwise the camera image would appear 180° upside down.

Adjusting the camera

Follow the steps below to adjust the angle of the camera:

- Loosen the screw (5) (Torx T8).
- Open up the Axis electronic module 6
- Loosen the locking screw (Torx T25) on the rear of the camera.
- Adjust the camera in the desired angle (max. 25° in every direction).
- Tighten the locking screw 7.
- Move the Axis electronic module 6 back into its original position.
- Tighten the screw 5.

First connection

The IP address is assigned directly via a DHCP server. If the network does not have a DHCP server, the default address "192.168.0.90/24" is used.

The web interface can be accessed via a web browser using the URL "http://<IP address>". Additionally, the URL "http://<username>:<password>@<IP address>/axis-cgi/mjpg/video.cgi" can be entered in a web browser to directly access the MJPEG stream.

Login for Axis web interface

User name: root Password: root

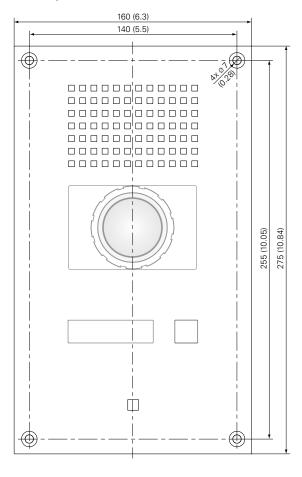

Attention

After a reset, the password has to be configured manually.

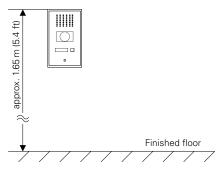

Dimensions front panel

Measuring units in mm (in), not to scale!

Recommended mounting height

It is recommended to mount the upper edge of the station approx. 1.65 m (5.4 ft) from the finished floor. Adapt the mounting height to individual needs.

Quality tested. Reliable. Smart.

Precautions

- This is a Class A product (standard EN 55032). In a domestic environment, this product may cause radio interference in which case the user may be required to take adequate measures.
- Cables must never be placed in the space between the black protective plate of the Axis camera module and the wall mount box. Doing so may cause damage to the Axis camera or compromise the tightness of the Intercom station's housing.
- All connected circuits shall fulfil the requirements for ES1 (cf. SELV acc. IEC/EN 60950-1) and PS2 (Limited Power Source) as per IEC/EN 62368-1.
- Let the device cool down completely before touching any parts of it.
- Unplug all Ethernet cables before performing any maintenance work on the device.
- Before using the device, ensure that all cables are undamaged and properly connected
- This device may only be installed, replaced and maintained by trained and properly qualified personnel (device class: ES1, PS2 acc. IEC/EN 62368-1). The connectors are subject to possible high transient voltage surges. The device is intended for appropriate installation in locations where operating personnel cannot come into contact with uninsulated wires.
- Devices belonging to another earthing network must not be connected to the device's connectors.

Mounting instructions

- Do not expose the station to extreme temperatures (see "Technical data").
- Observe the country specific standards for installation, mounting and configuration.
- When opening the station, ESD precautions must be observed.
- The station may only be opened by authorised service engineers.
- For flush mounting, the flush mount kit WSFB 50V or WSFB 50V FL is required (available separately).
- For surface mounting, a surface mount kit WSSH 50V is required (available separately).
- Use shielded Ethernet cables only.
- If the Intercom station is installed in a third-party column, ensure sufficient air circulation to prevent condensation and extreme heat generation (e.g. by means of ventilation slots at the top and bottom of the column).
 It is recommended to use ventilation grilles with small animal protection.

A strong worldwide network

COMMEND is represented all over the world by local Commend Partners and helps to improve security and communication with tailored Intercom solutions.
